UNIVERSITY OF HOUSTON-CLEAR LAKE

AN ACTIVE BUILDING FOR A RAPIDLY GROWING CAMPUS

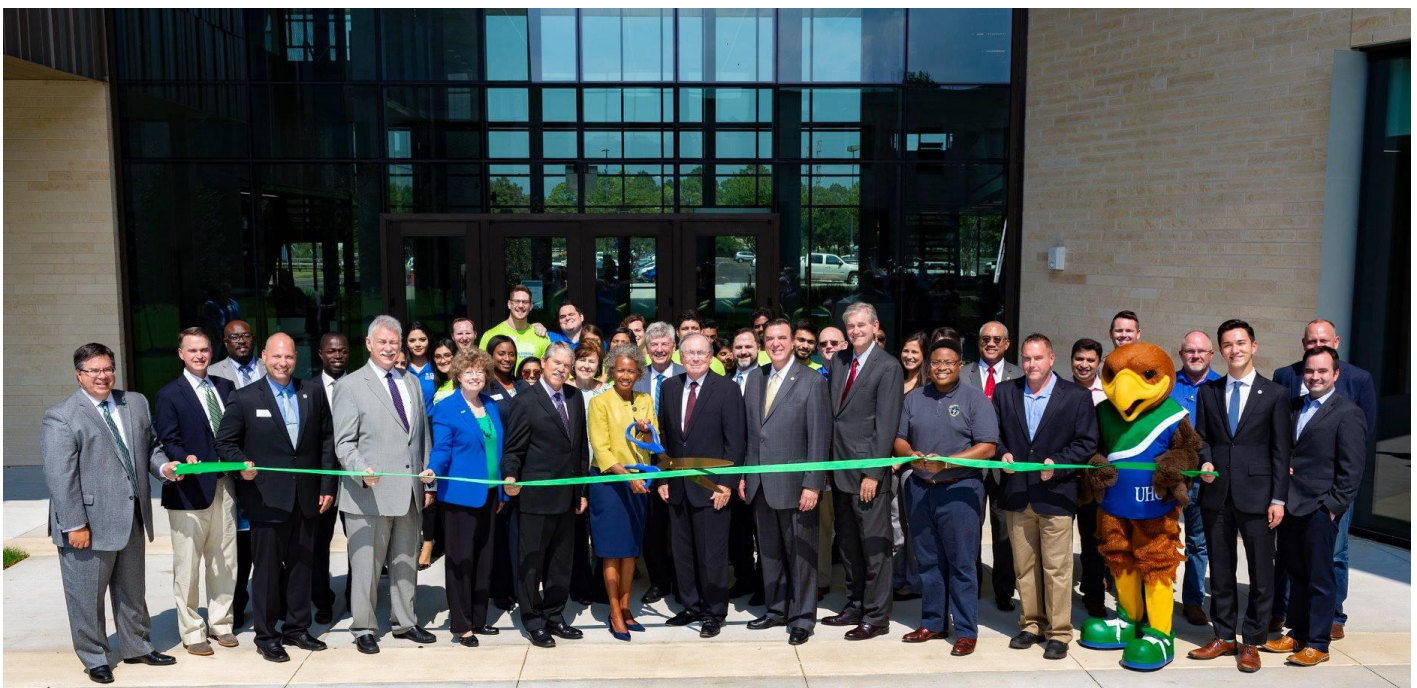

As numbers of students grew year over year at the campus, UHCL's Student Life Department earmarked \$38.2 million for the creation of a dedicated recreation and wellness center that would house health amenities and instructional space for students, faculty, and staff.

Goals:

- Utilize the latest technology and fitness industry trends
- Create an upscale facility for all fitness level exercisers, beginners to advanced.

Challenge: Find the correct product mix to not only meet the needs of the current students but attract and grow the enrollment for UH.

Solution: Provided Precor cardio featuring the P62 Networked console, complete line of Precor strength equipment (selectorized, plate-loaded and free weight) and a high-intensity Escape Fitness functional area for one-on-one and small group functional training.
