FIRST RESPONDERS

ENGINE 55

A PERMANENT HOME FOR A SORELY NEEDED FIRE DEPARTMENT

The city of Phoenix had not built a new fire station in ten years, but all of that changed with a permanent location at last for Engine 55. An advanced life support unit in Phoenix, the full-time crew of four had been operating out of a modified hotel suite since January 2018 – the Residence Inn by Marriott just south of Happy Valley Road. The temporary solution was put into place after a fire in December 2017 destroyed the children’s playground at Fireside in Norterra. Following a response time of 13 minutes, citizens grew increasingly concerned and started an online petition to build a fire station closer to the Norterra area by I-17 and Jomax Rd, with the goal of reaching 1,000 signatures. Though planning had started in 2001, on Dec. 9th the City of Phoenix announced it would set up and staff a permanent location, with finally opened on July 31, 2019 with Marathon Fitness proud to be chosen as the station’s sole fitness equipment provider.

FACILITY SIZE

862 sqft

COMPLETION DATE

July 2019

LOCATION

26700 N. 27th Ave
Phoenix, AZ 85085

DEMOGRAPHICS
